#### 2. Preparation

The Interim 1 Checking will focus on the product backlog and prototype. This simulates your first meeting with the client in a real-life scenario where you pitch your initial ideas about the product design.

Please bring your laptop with:

- Product backlog (the QM+ submitted version)
- Full Prototype (the QM+ submitted version)

### **3. The procedure**

Your group should use the product backlog and the prototype to explain your product design idea to one of the Teaching Assistants (who is not the one supporting your group). The lecturer will also go around to check all groups. You will receive some feedback from the TA and lecturers.

Ideally, each member speaks for 2 minutes. Each member will be asked 1 or 2 questions related to the product backlog, prototype and project management.

### **4. Marking Criteria**

Refer to the project handout in section 7.

The Interim 1 Checking is scheduled at one of the EBU6304 lecture slots, so it should not clash with other events. If any group member cannot attend due to Extenuating Circumstances (ECs), a formal EC application is required. Please refer to the policy document: <https://qmplus.qmul.ac.uk/mod/resource/view.php?id=2273977>

For general questions related to the group project, please post to the QM+ student forum. For personal matters which will not affect others, please email the module organiser Dr Ling Ma ( [ling.ma@qmul.ac.uk](mailto:ling.ma@qmul.ac.uk) )
